PREPARED FOR RIVERSIDE POKER CLUB

How the poker room is growing

Cash tables, app use and waiting lists from 19 December 2025 to 8 October 2026, taken from LetsPoker. Prepared on 9 October 2026.

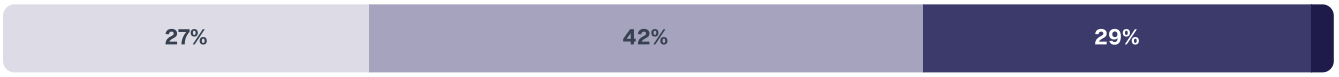
TABLES A DAY

2.70 from August to October, up from 1.76 in January to May

Cash days	Different players	Player visits	Hours played
281	1,274	6,030	23,758

DAYS BY NUMBER OF TABLES

281 days · average 2.05 tables a day



1 table	2 tables	3 tables	4 tables
77 days	117 days	82 days	5 days

WHAT STANDS OUT

01 More tables, more often

Since August the room runs 3 or more tables on most days (47 of 69). In January to May it was mostly 1 or 2. September had 18 days with 3 tables and 3 days with 4.

02 The room stays open longer

First table opens around 19:50 and the last one closes around 03:10. Open time went from 6 to 7 hours a day in spring to almost 8 hours since August.

03 Play grew faster than tables

September had 963 player visits and 3,776 hours played, against 572 visits and 2,209 hours in January. That is 68% more visits and 71% more hours.

04 Players line up from the app, hours before the game

63% of waiting list joins in the last 3 months came before 20:00, and 93% of those were made in the app. The busiest hour to join is 12:00.

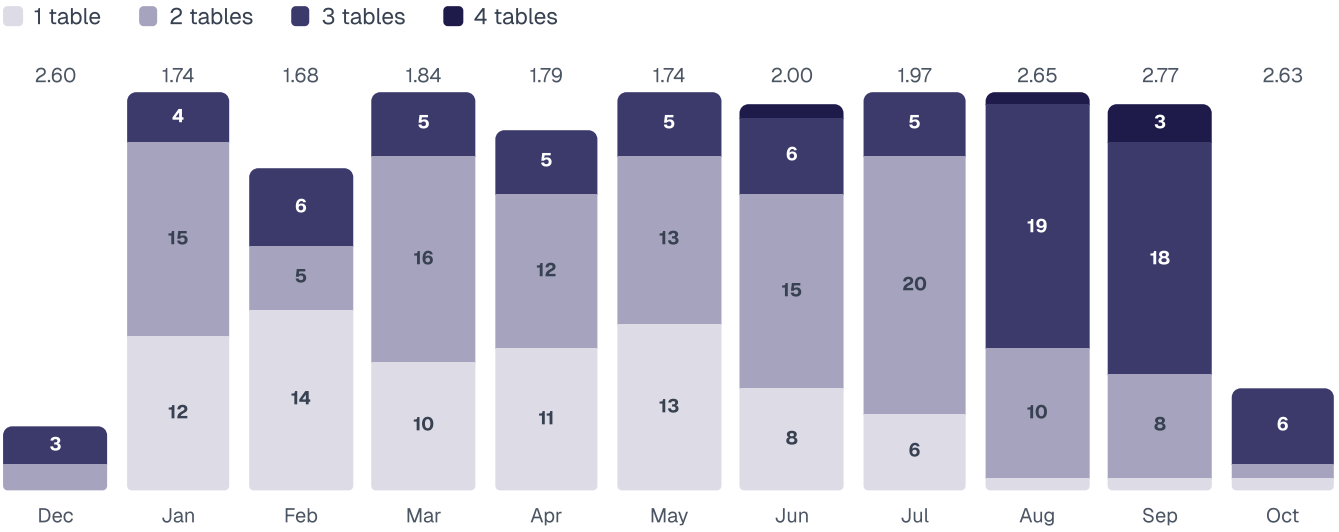
05 Demand for more games

In the last 3 months, PLO 2/5 and NLH 5/10 had 610 waiting list joins, and fewer than 1 in 5 ended in a seat. A sign there is room for a regular second game.

TABLES BY MONTH

From 1 or 2 tables to 3 most nights

Each column is a month. The column is split by how many cash days ran 1, 2, 3 or 4 tables.



Number above each column: average tables a day. December starts on 19 Dec, October ends on 8 Oct.

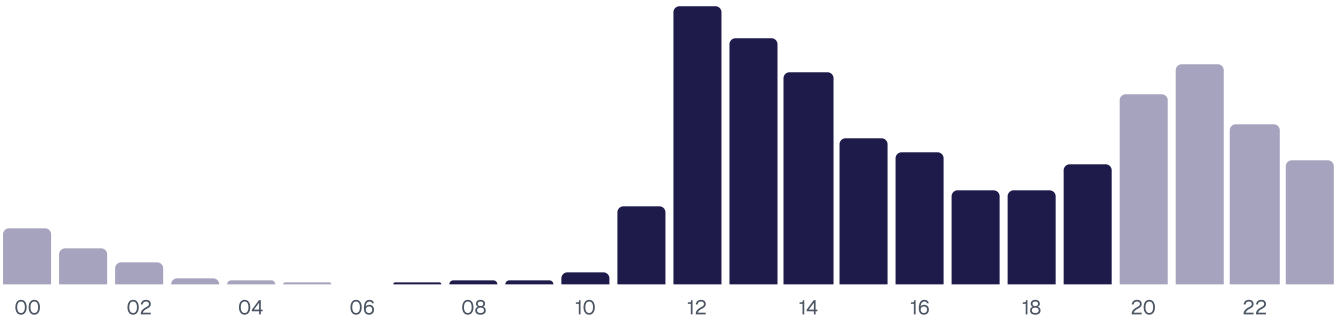
10,010	**61%**	**63%**	**93%**

JOINS BY HOUR

Last 3 months · 4,790 joins



The busiest hour is 12:00 with 597 joins. A player who joins at noon waits about 8 hours, so they are booking the evening game, not waiting at the door. After 20:00 the floor adds most players directly: only 44% of those joins come from the app.

NLH 5/10	296	61	**18%**
PLO 5/5	25	23	52%
PLO 1/2	20	11	5%

PLO 2/5 and NLH 5/10 draw 82 and 61 players onto their lists, yet fewer than 1 in 5 joins ends in a seat. That is demand a regular second game could pick up.

IDEAS TO TALK ABOUT

What the numbers suggest

01 **Plan the 3rd table from the noon list**

6 in 10 of the joins made before opening are in by 15:00. On Thursday to Saturday that list is a good signal to have a dealer ready for a 3rd table at opening.

02 **Give the second game a fixed night**

PLO 2/5 and NLH 5/10 keep drawing names but rarely start. A set night for one of them lets those players plan around it.

03 **Use the 281 cash followers**

A cash push when a new game opens reaches people who already asked for it, and most of them have the app ready on their phone.

HOW WE COUNTED

Definitions

Gaming day	Play before 06:00 belongs to the day before, so a night that ends at 04:00 counts as one day.
Tables a day	The different cash tables that ran that day, not the most running at the same moment. A table closed and replaced by another counts twice.
Open hours a day	From the first seat at the first table to the last seat out at the last table. Two days with unclosed tables (14 Feb, 21 Jun) are left out of this average.
Table hours	Each table from its first seat to its last seat out, added up.
Players, visits, hours	Players are different people. A visit is one player on one day. Hours played add up every seated player.
App people	One account, or one phone without an account, that opened Riverside in the LetsPoker app. App data counts screens, not purchases or play.
Waiting list join	One time a player went on a cash list. Transfer lists for seated players are left out. "In the app" means the join came from the app.
Seated	The player sat down within 2 minutes of leaving the list. A player who left the list and sat later, or played another game, counts as not seated, so this rate is a floor.
Period	19 December 2025, the first cash day in LetsPoker, to 8 October 2026. Last 3 months means 9 July to 8 October 2026.
